

COMPLETE App

Invoice and POD administration application

An application that keeps you connected to POD and invoice status and provides real time visibility.

Overview of the COMPLETE App

Our COMPLETE App automates the processes of managing your carrier invoices and POD's. This saves you both time and money. It also makes life easier for your carriers enabling them to update costs, upload POD's and submit cost additions for your approval.

Example Customer Problems

"We don't have time to check all of our carrier invoices line by line, so we can't be sure if we are overpaying or not".

"The first time we see additional charges is often when the invoice arrives. This make it difficult to check if these were approved and by whom".

"We always seem to be chasing carriers for missing POD's".

Digital Transport System Solutions

3T's COMPLETE App will automate the line by line checking of your invoices to ensure you are not overpaying your carriers. It will also alert you to any missing POD's and cost additions. Average savings achieved are between 3-6%.

3T's COMPLETE App allows carriers to upload additional charges as they occur for your approval or rejection.

3T's COMPLETE App keeps track of all your carriers POD's in one place. It also alerts you and your carriers to any missing POD's.

Typical ROI per £20 million T/O

Industry studies show that carrier overcharges are between **1-2%** on outbound shipping and between **2-4%** on inbound shipments. For a £20 million T/O company that equates to savings of between **£10-£20k** on outbound and **£20-£40k** on inbound.
